INDEX TO VOLUME 112

Age and Tectonic Setting of the Camagüey Volcanic-Intrusive Arc, Cuba: Late Cretaceous Extension and Uplift in the Western Greater Antilles [C. M. Hall, S. E. Kesler, N. Russell, E. Piñero, R. Sánchez C., M. Pérez R., J. Moreira, and M. Borges], 521

Age, Correlation, and Provenance of the Neoproterozoic Skelton Group, Antarctica: Grenville Age Detritus on the Margin of East Antarctica [R. J. Wysoczanski and A. H. Allibone], 401

Allen, C. M. *See* Eriksson, K. A.

Allibone, A. H. *See* Wysoczanski, R. J.

Al-Zubi, H. *See* Janssen, C.

Andò, S. *See* Garzanti, E.

Archean Molasse Basin Evolution and Magmatism, Wabigoon Subprovince, Canada [J. Dostal, W. U. Mueller, and J. B. Murphy], 435

Argnani, A., D. Fontana, C. Stefani, and G. G. Zuffa. *Late Cretaceous Carbonate Turbidites of the Northern Apennines: Shaking Adria at the Onset of Alpine Collision*, 251

Avouac, J.-P. *See* Poisson, B.

Bahlburg, H. *See* Kleine, T.

Bambach, R. K. *See* Bush, A. M.

Barr, S. M. *See* Miller, B. V.

Beard, J. S., P. C. Ragland, and T. Rushmer. *Hydration Crystallization Reactions between Anhydrous Minerals and Hydrous Melt to Yield Amphibole and Biotite in Igneous Rocks: Description and Implications*, 617

Beauchamp, B. *See* Patchett, P. J.

Becker, T. P. *See* Thomas, W. A.

Bhaskar Rao, Y. J. *See* Ravikant, V.

Bock, B. *See* Eriksson, K. A.

Borges, M. *See* Hall, C. M.

Buchan, K. L. *See* Prokoph, A.

Buck, B. J., A. D. Hanson, R. A. Hengst, and Hu S.-s. *"Tertiary Dinosaurs" in the Nanxiong Basin, Southern China, Are Reworked from the Cretaceous*, 111

Bush, A. M., and R. K. Bambach. *Did Alpha Diversity Increase during the Phanerozoic? Lifting the Veils of Taphonomic, Latitudinal, and Environmental Biases*, 625

Campbell, I. H. *See* Eriksson, K. A.

Cerling, T. E. *See* Fenton, C. R.

Chamberlain, K. R. *See* Ferguson, C. B.

Chemical Compositions and Tectonic Significance of Chrome-Rich Spinels in the Tianba Flysch, Southern Tibet [B. Zhu, W. S. F. Kidd, D. B. Rowley, and B. S. Currie], 417

Cherepanova, I. Y. *See* Ispolatov, V. O.

The Chesapeake Bay Crater, by C. W. Poag, C. Koeberl, and W. U. Reimold. *Review* by M. R. Dence, 622

Chokel, C. B. *See* Cox, R.

Chung, S.-L. *See* Xu, Y.-G.

Classification of Refold Structures [B. Grasemann, G. Wiesmayr, E. Draganits, and F. Fusseis], 119

Coleman, D. S. *See* Cox, R.

Collins, A. S. *See* Cox, R.

Collision-Orogen Provenance (Western Alps): Detrital Signatures and Unroofing Trends [E. Garzanti, G. Vezzoli, B. Lombardo, S. Andò, E. Mauri, S. Monguzzi, and M. Russo], 145

Comparing Species Diversity in the Modern and Fossil Record of Lakes [E. H. Gierlowski-Kordesch and L. E. Park], 703

A Continental Drift Flipbook [C. R. Scotese], 729

Contrasting Cenozoic Lithospheric Evolution and Architecture in the Western and Eastern Sino-Korean Craton: Constraints from Geochemistry of Basalts and Mantle Xenoliths [Y.-G. Xu, S.-L. Chung, J. Ma, and L. Shi], 593

Cox, R., D. S. Coleman, C. B. Chokel, S. B. DeOreo, J. L. Wooden, A. S. Collins, B. De Waele, and A. Kröner. *Proterozoic Tectonostratigraphy and Paleogeography of Central Madagascar Derived from Detrital Zircon U-Pb Age Populations*, 379

Crustal Evolution along the Early Ordovician Proto-Andean Margin of Gondwana: Trace Element and Isotope Evidence from the Complejo Igneo Pocitos (Northwest Argentina) [T. Kleine, K. Mezger, U. Zimmermann, C. Münker, and H. Bahlburg], 503

Currie, B. S. *See* Zhu, B.

The Dead Sea Transform: Evidence for a Strong Fault? [C. Janssen, R. L. Romer, A. Hoffmann-Rothe, D. Kesten, and H. Al-Zubi], 561

Dence, M. R. *Review*, 622

DeOreo, S. B. *See* Cox, R.

De Ros, L. F. *See* Maraschin, A. J.

Detrital Zircon Ages from Early Proterozoic Quartzites, Wisconsin, Support Rapid Weathering and Deposition of Mature Quartz Arenites [N. Van Wyck and M. Norman], 305

Detrital Zircon Evidence of a Recycled Orogenic Foreland Provenance for Alleghanian Clastic-Wedge Sandstones [W. A. Thomas, T. P. Becker, S. D. Samson, and M. A. Hamilton], 23

De Waele, B. *See* Cox, R.

Did Alpha Diversity Increase during the Phanerozoic? Lifting the Veils of Taphonomic, Latitudinal, and Environmental Biases [A. M. Bush and R. K. Bambach], 625

Dostal, J., W. U. Mueller, and J. B. Murphy. *Archean Molasse Basin Evolution and Magmatism, Wabigoon Subprovince, Canada*, 435

Draganits, E. *See* Grasemann, B.

Driese, S. G. *Pedogenic Translocation of Fe in Modern and Ancient Vertisols and Implications for Interpretations of the Hekpoort Paleosol (2.25 Ga)*, 543

Duebendorfer, E. M. *See* Ferguson, C. B.

Embry, A. F. *See* Patchett, P. J.

Eriksson, K. A., I. H. Campbell, J. M. Palin, C. M. Allen, and B. Bock. *Evidence for Multiple Recycling in Neoproterozoic through Pennsylvanian Sedimentary Rocks of the Central Appalachian Basin*, 261

Ernst, R. E. *See* Prokoph, A.

Event Suspended Sediment Characteristics and the Generation of Hyperpycnal Plumes at River Mouths: East Coast Continental Margin, North Island, New Zealand [D. M. Hicks, B. Gomez, and N. A. Trustrum], 471

Evidence for Multiple Recycling in Neoproterozoic through Pennsylvanian Sedimentary Rocks of the Central Appalachian Basin [K. A. Eriksson, I. H. Campbell, J. M. Palin, C. M. Allen, and B. Bock], 261

Fenton, C. R., R. J. Poreda, B. P. Nash, R. H. Webb, and T. E. Cerling. *Geochemical Discrimination of Five Pleistocene Lava-Dam Outburst-Flood Deposits, Western Grand Canyon, Arizona*, 91

Ferguson, C. B., E. M. Duebendorfer, and K. R. Chamberlain. *Synkinematic Intrusion of the 1.4-Ga Boriana Canyon Pluton, Northwestern Arizona: Implications for Ca. 1.4-Ga Regional Strain in the Western United States*, 165

Floral Diversity Data in the Assessment of Paleoclimate in the Paraná Basin, Southern Brazil [K. Goldberg], 719

Foliar Physiognomic Record of Climatic Conditions during Dor-

mancy: Climate Leaf Analysis Multivariate Program (CLAMP) and the Cold Month Mean Temperature [R. A. Spicer, A. B. Herman, and E. M. Kennedy], 685

Fontana, D. *See* Argnani, A.

Fusseis, F. *See* Grasemann, B.

Garzanti, E., G. Vezzoli, B. Lombardo, S. Andò, E. Mauri, S. Monguzzi, and M. Russo. *Collision-Orogen Provenance (Western Alps): Detrital Signatures and Unroofing Trends*, 145

Geochemical Conditions of Deposition in the Upper Devonian *Prypiac' and Dnipro-Donets Evaporite Basins (Belarus and Ukraine)* [O. Y. Petrychenko and T. M. Peryt], 577

Geochemical Discrimination of Five Pleistocene Lava-Dam Outburst-Flood Deposits, Western Grand Canyon, Arizona [C. R. Fenton, R. J. Poreda, B. P. Nash, R. H. Webb, and T. E. Cerling], 91

Geochemistry of Mafic Enclaves and Host Granitoids from the Chilliwack Batholith, Washington: Chemical Exchange Processes between Coexisting Mafic and Felsic Magmas and Implications for the Interpretation of Enclave Chemical Traits [J. H. Tepper and S. M. Kuehner], 349

Gierlowski-Kordesch, E. H., and L. E. Park. *Comparing Species Diversity in the Modern and Fossil Record of Lakes*, 703

Goldberg, K. *Floral Diversity Data in the Assessment of Paleoclimate in the Paraná Basin, Southern Brazil*, 719

Gomez, B. *See* Hicks, D. M.

Gopalan, K. *See* Ravikant, V.

Graham, S. A. *See* Ritts, B. D.

Grasemann, B., G. Wiesmayr, E. Draganits, and F. Fusseis. *Classification of Refold Structures*, 119

Hall, C. M., S. E. Kesler, N. Russell, E. Piñero, R. Sánchez C., M. Pérez R., J. Moreira, and M. Borges. *Age and Tectonic Setting of the Camagüey Volcanic-Intrusive Arc, Cuba: Late Cretaceous Extension and Uplift in the Western Greater Antilles*, 521

Hamilton, M. A. *See* Thomas, W. A.

Hanley, J. J. *See* Mungall, J. E.

Hanson, A. D. *See* Buck, B. J.

Harrison, J. C. *See* Patchett, P. J.

Heizler, M. *See* Ispolatov, V. O.

Hengst, R. A. *See* Buck, B. J.

Herman, A. B. *See* Spicer, R. A.

Hicks, D. M., B. Gomez, and N. A. Trustrum. *Event Suspended Sediment Characteristics and the Generation of Hyperpycnal Plumes at River Mouths: East Coast Continental Margin, North Island, New Zealand*, 471

Hoffmann-Rothe, A. *See* Janssen, C.

Holm, R. F. *Landslide Preconditions and Collapse of the San Francisco Mountain Composite Volcano, Arizona, into Cold Debris Avalanches in Late Pleistocene*, 335

Holocene Hydrological Changes Inferred from Alluvial Stream Entrenchment in North Tian Shan (Northwestern China) [B. Poisson and J.-P. Avouac], 231

Hovius, N. *See* Schaller, M.

Hu, S.-s. *See* Buck, B. J.

Hydration Crystallization Reactions between Anhydrous Minerals and Hydrous Melt to Yield Amphibole and Biotite in Igneous Rocks: Description and Implications [J. S. Beard, P. C. Ragland, and T. Rushmer], 617

Ice and Its Consequences: Glaciation in the Late Ordovician, Late Devonian, Pennsylvanian-Permian, and Cenozoic Compared [A. Raymond and C. Metz], 655

Isachsen, C. E. *See* Patchett, P. J.

Ispolatov, V. O., P. L. Tikhomirov, M. Heizler, and I. Y. Cherepanova. *New 40Ar/39Ar Ages of Cretaceous Continental Volcanics from Central Chukotka: Implications for Initiation and Duration of Volcanism within the Northern Part of the Okhotsk Chukotka Volcanic Belt (Northeastern Eurasia)*, 369

Janssen, C., R. L. Romer, A. Hoffmann-Rothe, D. Kesten, and H. Al-Zubi. *The Dead Sea Transform: Evidence for a Strong Fault?* 561

John, T., V. Schenk, K. Mezger, and F. Tembo. *Timing and PT Evolution of Whiteschist Metamorphism in the Lufilian Arc–Zambezi Belt Orogen (Zambia): Implications for the Assembly of Gondwana*, 71

Johnson, M. E., Rong J.-y., and Su W.-b. *Paleogeographic Orientation of the Sino-Korean Plate Based on Evidence for a Prevailing Silurian Wind Field*, 671

Kaufmann, B., E. Trapp, and K. Mezger. *The Numerical Age of the Upper Frasnian (Upper Devonian) Kellwasser Horizons: A New U-Pb Zircon Date from Steinbruch Schmidt (Kellerwald, Germany)*, 495

Kennedy, E. M. *See* Spicer, R. A.

Kesler, S. E. *See* Hall, C. M.
